PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years shipping production Angular systems (v12-21) across 10+ projects for teams in Saudi Arabia, Switzerland, and Egypt. Owns delivery end-to-end, from requirements and NgRx/RxJS state architecture through bilingual Arabic/English interfaces that hold up under real production load, not just in a demo. Now building full-stack and cloud depth on top of that foundation: Java and Spring Boot for backend services, AWS and Terraform for infrastructure, and Docker/Kubernetes for deployment, extending frontend ownership into systems ownership.

CORE COMPETENCIES

Angular 12-21 · Standalone Components & Modern Control Flow · TypeScript · RxJS & NgRx State Architecture · Angular Signals · GitLab CI/CD · Playwright / Jest Testing · RTL / Arabic-English i18n · Production Debugging & Problem Solving

WORK EXPERIENCE

INNOSOFT (previously Solutions by 42) Apr 2024 - Present
Frontend Engineer — Saudi digital transformation & custom software delivery

- Built a multi-surface commercial platform frontend from an empty repo to production — onboarding, dashboards, map-based discovery, and offers — fully bilingual in Arabic and English.
- Led frontend delivery for a regulated workflow platform; designed the NgRx store, selectors, and effects powering case lifecycles across 5+ interconnected modules with zero state corruption in production.
- Standardized Arabic/English RTL/LTR patterns and shared translation infrastructure across modules, enabling GCC-ready delivery.
- Integrated Google Maps-based location search with responsive filters and async loading states; introduced ESLint, Prettier, Husky, and Playwright to raise review quality and protect critical release flows.

MODESO Aug 2023 - Apr 2024
Full-Stack Software Engineer (frontend-focused) — Swiss agency building web and mobile products for startups and enterprises

- Shipped responsive Angular flows and reusable components across multiple concurrent client products in a fast-paced agency environment.
- Built RxJS-driven data flows and REST API integrations with complete loading, empty, and error states for stable production journeys.
- Root-caused and resolved complex RxJS race conditions that were causing intermittent data loss in production.

Integrated Solutions for Ports (ISFP) Jan 2023 - Jul 2023
Front End Engineer — Transport automation and business process management for Egyptian ports

- Delivered production workflow screens and reusable components for a government port-digitalization programme.
- Integrated frontend flows with backend services; validated critical workflows in system test environments ahead of releases.

EDUCATION

BSc Computer Science
University of Northampton - Class A with Honours

BSc Computer Science
Arab Academy for Science, Technology & Maritime Transport - GPA 3.54 / 4 (Honours)

CERTIFICATIONS — IN PROGRESS

AWS Certified Solutions Architect - Associate	IN PROGRESS
HashiCorp Certified: Terraform Associate	IN PROGRESS
Certified Kubernetes Application Developer (CKAD)	IN PROGRESS
Backend build path: Java → Spring Boot → REST API & database design	BUILDING

SKILLS

Frontend: Angular 12-21 · Standalone Components · Control Flow (@if/@for) · TypeScript · JavaScript · RxJS · NgRx · Angular Signals · Reactive Forms · Angular Router · Angular Material · PrimeNG · RTL/LTR i18n
Backend & cloud (building): Java · Spring Boot · REST API Design · SQL · AWS · Terraform · Docker · Kubernetes · System Design
APIs & Integration: REST APIs · JWT · Swagger · SignalR · Google Maps API
Tools & Practices: Git · GitHub · Playwright · Jest · ESLint · Prettier · Husky · GitLab CI/CD
