PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years of experience building production Angular applications for teams in Switzerland, Saudi Arabia, and Egypt. Built major frontend functionality for a Saudi employee-benefits platform serving approximately 150,000 users daily and designed NgRx stores, selectors, and effects across 5+ business modules for a complex arbitration workflow product. Strong in Angular architecture, TypeScript, RxJS, reusable component systems, REST API integration, responsive Arabic/English interfaces, and RTL/LTR delivery. Available for remote roles across European and Gulf time zones, as a contractor or through an Employer of Record.

SKILLS

Frontend: Angular · TypeScript · JavaScript · RxJS · NgRx · HTML5 · CSS3 · SCSS · Reactive Forms · Angular Router · Angular Material · PrimeNG
Architecture: Reusable Component Systems · State Management · Reactive Workflows · Responsive Design · Frontend Performance · Arabic/English Localization · RTL/LTR
Integration & Quality: REST APIs · Google Maps API · Production Debugging · ESLint · Prettier · Husky · Git · GitHub
Additional Exposure: .NET APIs

WORK EXPERIENCE

INNOSOFT (previously Solutions by 42) Apr 2024 - Present
Frontend Engineer — Saudi digital transformation & custom software delivery

- Built major parts of Tagdeer’s Angular frontend from scratch for a Saudi employee-benefits platform serving approximately 150,000 users daily, covering onboarding, dashboards, offers, routing, and reusable components.
- Integrated REST APIs and Google Maps-based location discovery with responsive filters, loading states, and asynchronous user flows.
- Delivered responsive Arabic/English experiences using shared localization patterns and consistent RTL/LTR behavior.
- Designed and maintained NgRx stores, selectors, and effects across 5+ Tahkeem business modules supporting complex arbitration and multi-step asynchronous workflows.
- Improved frontend standards and local quality checks using ESLint, Prettier, and Husky.

MODESO Aug 2023 - Apr 2024
Full-Stack Software Engineer — Frontend Focus — Swiss agency building web and mobile products for startups and enterprises

- Shipped responsive Angular flows and reusable components across multiple concurrent client products in a fast-paced agency environment.
- Built RxJS-driven data flows and REST API integrations with complete loading, empty, and error states for stable production journeys.
- Root-caused and resolved complex RxJS race conditions that were causing intermittent data loss in production.

Integrated Solutions for Ports (ISFP) Jan 2023 - Jul 2023
Front End Engineer — Transport automation and business process management for Egyptian ports

- Delivered production workflow screens and reusable components for a government port-digitalization programme.
- Integrated frontend flows with backend services; validated critical workflows in system test environments ahead of releases.

SELECTED OPEN SOURCE

ngx-hyperpay — Angular Payment Integration Library | GitHub · npm

- Published and maintain a configurable Angular library wrapping HyperPay COPYandPAY with typed input configuration and callback handling for resource paths and payment IDs.
- Documented server-side handling for sensitive operations and maintain semantic-release and unit-test infrastructure.

EDUCATION

BSc Computer Science
University of Northampton - Class A with Honours

BSc Computer Science
Arab Academy for Science, Technology & Maritime Transport - GPA 3.54 / 4 (Honours)
